

Objective of the Webinar

- Go (also called Golang or Go language) is an open source programming language used for general purpose. Go was developed by Google engineers to create dependable and efficient software. The language addresses issues like slow build time, uncontrolled dependencies, effort duplication, difficulty of writing automatic tools and cross-language development. Due to its efficiency Golang is used by organizations like Google, Cloudflare, Dropbox, MongoDB, Netflix, SoundCloud, Twitch and Uber. Current placement drives were having requirement of Knowledge on Golang.
- With intention to make our students aware on the basics of the Golang language, MCA Department organized workshop on Golang under the banner of **SCETAA** and technically supported by Bosleo Technology. The Industry Expert Mr. Harsh Modi, Director, Bosleo Technology and Mr. Ashwek Swamy designated as Tech Lead in Bosleo Technologies conducted the workshop.

good supportive team

The workshop was good and very easy to understand. Sir has made the content very easy to understand and make it fun.

It was Very Excellent Workshop

code should be share live to every student so that they can do fast work black dress guy was best other guy was not help full and plz share code in advance so that we can type fast and in less time more work can be done

It was very good experience to study goLang.

It Was Really Good And We Learn About New Technology which We Never Heard About . so yes It Was Nice

it was very a excellent worksop

Good

The response to the workshop and feedback by the students was good. Comments of the students have been included in the report for reference. We would like to thank **Dr. Hiren Patel**, Principal, SCET, for providing an opportunity to schedule such workshop. We would also like to thank **Dr. Chirag Paunwala Convener, SCETAA** for his support in organizing this workshop.
