A Report on Interaction with Alumni

Organized by

Computer Engineering Department

Coordinated by

Prof. Bintu Kadhiwala

Prof. Jaydeep Barad

(SCETAA Representatives, Computer Engineering Department)

Alumni

Er. Kunal Sharma

On

4th January, 2020

The Computer Engineering Department of SCET had organized a session on “**Career guidance and recent trends in software industry**” for BE Pre Final year students on **4th January, 2020** under the banner of “**Share What I Gain**” initiated by **SCET Alumni Association**. 121 students of Computer Engineering Department along with **4 faculties** attended this session.

The talk started with a formal introduction of the speaker by **Prof. Jaydeep Gheewala**.

About the Alumni :

The brief profile of the speaker is as follows:

Graduation : Bachelor in Computer Engineering (SCET - Graduation: 2018)

Current Position :

- Software developer at Firstinsight Pvt. Ltd. , Chennai.

Area of Interest :

- Devops
- Web Development
- Cloud Computing

Work Experience :

- Software developer at Firstinsight Pvt. Ltd., Chennai. (2018-present)

Objectives of the talk :

- To make the students aware of recent technology and how to get placed in a good company.
- To acknowledge the importance of competitive coding, communication skills in the making of career.
- How machine-learning, artificial intelligence, block-chain is important as latest technologies.
- To guide students on how to prepare for an interview at top MNCs like Google, Amazon, Facebook, etc.
- How to make strong and impressive resume.
- To make students aware regarding the different career prospects after graduation.

Highlights of the interaction :

The intuition behind this talk was career guidance and recent trends in software industry. It was also to make them aware about the importance of technical skills required by the companies as they provide placement once the students have completed their graduate degree course.

Kunal started the talk by introducing himself as a SCET alumni and his experience in the institute also giving the students a brief insight about his placement, company he is currently working in, his work experience and his current package.

He then shared his way of working that lead him to his current position. He participated in many competitive coding challenges. He refined his technical skills by practice and encouraged the students to do the same. His achievements include him becoming the Head of Google Developer Student Club (2017-18) also the winner of India Hacks 2017 on IoT track, bangalore and getting a runner-up in Student's Voice category at Smart India Hackathon, Guntur.

He then briefed the students on how internships are important and that communication skill is given no less importance. He guided the students to start learning old and new technologies and have the basics clear for all of it so to have a basic answer for any question asked as a Computer engineer graduate and that this the right time for a third year student to have command on application development. He also showed great interest while talking about platforms like hackerearth, hackerrank, codechef, codevita and also spoke about company training and hiring challenges. He then explained about an e-voting application that he made for college cultural fest (VERVE). Going on he explained the importance of final year project and how to excel with a good team, guide selection and suggesting students to go with natural problem definition.

He strongly believes that education is one space that has the potential to get in the students the desire of transforming the world by Technology. He believes that start with any technology that fascinates you and if it keeps on fascinating you then dive deep into it.

Kunal then, in context to university application process, also explained in depth, the extent to which each aspect of the applicant's profile matters, how the different aspects influence each other, and how they are used in conjunction to arrive at a final decision. He also tried to guide students on how to make a worthy resume, which are not nobody, would ignore and highlighted pitfalls that should be avoided by applicants.

All in all, it was a very riveting talk and we did receive very good feedback about the speaker and the contents of the talk.

Glimpse of the interaction :
