The sole mission of the Developer Student Club (DSC) is to bring together like-minded students interested in Google technologies. Powered by Google Developers, DSC endeavors to wedge the gap between theory and practice. We, 8 DSC's come together promoting our motto as we profoundly welcome applications from students throughout the country. DSC encourages students to solve real-world problems and also gives an amazing opportunity to connect with alike minds, learn from them and grow towards their goals in their own way.
