Students Council, SCET

Introduction

The department of Information Technology and Artificial Intelligence and Data Science have enthusiastically celebrated the World Intellectual Property (IP) Day by organizing a session on “Intellectual Property Rights” on 26th April 2024 from 10:00 am to 01:00 pm. The purpose of this event was to increase awareness among public about the value of intellectual property rights and to emphasize how IP fosters creativity and innovation.

About World Intellectual Property Day

World Intellectual Property Day is observed annually on April 26th. It was established by the World Intellectual Property Organization (WIPO) in 2000 to raise awareness about the role that intellectual property (IP) rights play in encouraging innovation and creativity. World IP Day provides an opportunity to promote understanding of IP rights, encourage innovation and creativity across various fields, highlight the importance of IP in fostering economic growth and development, and discuss the challenges and opportunities associated with protecting IP in the modern world.

Participation Details:

The students of Second Year and Third Year of IT and AI-DS departments were present at the event. A total of approximate 40 students were present for the celebration of Independence Day.

Event Highlights:

An inauguration ceremony took place in the classroom to kick off the festivities. The event was graced by our chief guest Mr. Vivek Chapaneria an enthusiastic researcher having deep insights in intellectual property rights, where he gave the keynote speech and emphasized the importance of IP in the modern knowledge-driven economy. Mr. Vivek Chapaneria is currently pursuing his doctoral research at SVNIT, Surat and is highly involved in the activities aiming to promote IP awareness and role of IP prospectus in the professional life.

Mr. Vivek focused on describing the term "intellectual property" as legal utilization of art and literature, inventions, designs, names, symbols, and pictures in work. He bifurcated IP into separated groups which involves

Patents: Guard novel ideas and cutting-edge scientific discoveries.

Trademarks: Protect company names, emblems, and catchphrases.

Copyrights: Protect literary and artistic creations, such as movies, music, and novels.

Trade secrets: Describe private company data that gives you a competitive advantage.

Mr. Vivek also emphasized on the importance and essentiality of IPR. He encouraged students to adapt the innovative ideas and follow the legal approach and gain the value of the work.

Conclusion:

World Intellectual Property Day serves as a vital reminder of the importance of intellectual property in our daily lives. It encourages the protection and respect of IP rights, which in turn promotes innovation, creativity, and economic growth. By celebrating World IP Day, we recognize and honor the contributions of inventors, creators, and innovators who drive progress and enrich our world.

We express our heartfelt gratitude to the Provost, Principal, faculty members, and all the participants and students for making this World Intellectual Property day a truly memorable and meaningful event. As we look forward to the coming years, we aspire to continue this tradition of spreading technical awareness among our students with enthusiasm and dedication.
