

A talk on 'Clearing Aptitude and Interview (Target TCS)'

Date: 24/2/2016

Time: 2:30 PM

Target Audience: BE IV year (open to all branches except ECC)

Speaker: Prof. Sarosh K. Dastoor

To

The Head of Department

Training and Placement Cell

SCET

Sub: A brief report on the Talk conducted on 'Clearing Aptitude and Interview (Target TCS)'

Respected Sir

It's a pleasure to inform you that T&P Cell of Electronics and Communication Department conducted a Talk on '**Clearing Aptitude and Interview (Target TCS)**' for the final year students (open to all branches and III year students).

Nearly 100+ final year and third year students were present during the session. The talk mainly focussed on the following skills required for the successful placement in a Company:

- 1) Aptitude test (Quantitative analysis, attempting and finally cracking)
- 2) Technical Round (Software based subjects, Object oriented Programming, Computer Networks etc)
- 3) Passage writing and listening skills
- 4) HR/ Personal Interview skills

It was a complete interactive session, whereby students quite enthusiastically took part in solving the Aptitude questions, passage interaction and HR related Questions. Students were provided with the Aptitude Series Question Papers of TCS with the Solution, Quantitative Series Link and the power point presentation of the talk. The feedback (message) of the Alumni (of ECC) recruited in TCS, was highlighted to the students for creating awareness and gaining momentum.

The main goal behind the Talk was to improve the Placement and thereby ignite the inner hidden skills of the students to lead 'TOWARDS PROGRESSIVE CIVILIZATION'.

Sarosh K. Dastoor

Asst Professor, (Placement Representative, ECC Department)
