NSS CELL, SCET

PROGRAM OFFICER
PROF. NIKET SHASTRI

Halla Bol initiative targeted at spreading social messages through the U-turn theme of our city. Their initiative was “Healthy Girls Healthy India” under which they spread awareness on the minimum haemoglobin level every girl above 12 must have. They claimed 12+ for 12+ meaning blood level above 12 for every 12+ aged girls. Under that NSS team of our college joined them to spread a social message regarding “**No Honk**”.

The Objectives of our campaign included –

1. To distribute stickers stating “No Honk” to the city people for their vehicles.
2. Taking Promises from people regarding No honk.
3. Explaining them the ill effects of Honking unnecessary on the roads.

More than 200 stickers as well as oaths by the people got pledged early in the morning at the U-turn. We received a lot of appreciations regarding the campaign.

We demonstrated our message using the placards and the banners explaining people the side effects of honking which are –

1. Mental illness
2. Hearing ailment.
3. Environment Disorderliness.
4. Noise pollution.
5. Increasing Disturbance breaking the harmony.
