

VISIT REPORT ON LIVE MEASUREMENT OF COMMERCIAL BUILDING

Faculty of Civil Engineering, SCET

Departmental Head: Prof.(Dr.) Jigar Sevalia

Date: 5th July 2018

Visit Location: Times Square, VIP Road, Surat.

The Students B. E. Civil IV are studying a subject Professional Practice and Valuation. Under the subject, for a better exposure, a trip arranged to under construction site at Times Square, VIP road, Surat (Commercial Building) was planned and executed. Total 70 students participated during academic visit under lead from assigned faculty co-ordinators for tutorial subject.

Team of students and faculties during visit

During the visit students had an opportunity to interact with site engineer of project and discussed the various aspects of building planning, layout designing, measurement, material cost as well as quantity estimation for ongoing building project. They also received practical knowledge of safety measures, working operation, level of accuracy with resource optimization by adopting innovative techniques.

During this visit around 70 students performed actual practice for live measurement for all components of super structure, basement parking etc. It's a great opportunity to visit under construction site.
