

VISIT REPORT OF KATARGAM WATER WORKS

As a part of curriculum under the subject of **“Water and Wastewater Engineering”** offered to M.E Environment Engineering (Sem-II) and B.E Civil Engineering (Sem- VI) students have visited Water Works at Katargam, Surat on 21/02/2018. Total of 85 students along with faculties have visited the plant. The students were fortunate to have detailed explanation of the water works which includes the Intake well, Lamella Clarifier, flash mixer, Rapid Sand filter, Chlorination process and various units along with the SCADA system used for operation of the plant. I would like to thank Head of the Department Dr. Pratima Patel for continuously motivating us to arrange academic trips to gain field based experience. Some glimpses of the plant are reported.
