Information Technology Department

Guest Lecture on “Privacy Preserving Data Publishing”

The Information Technology Department organized a guest lecture and interactive session on the topic “Privacy Preserving Data Publishing”, as an initiative of the SCET R & D Lecture series. The R & D Lecture series aims to keep the students and faculty members abreast of the emerging areas in Information Technology and to motivate them for research.

The details of the guest talk are as below:

Topic: Privacy Preserving Data Publishing

Speaker: Dr. Udai P. Rao, Assistant Professor, Computer Engineering Department, NIT, Surat

Date/Time: 14/8/2015 at 1:15 PM

R & D Session Co-ordinator: Dr. Mita Parikh, HOD, IT Department, SCET

Highlights of the R & D Session:

Dr. U. P. Rao delivered an interesting talk on “Privacy Preserving Data Publishing”, which is an area of Data Mining that focuses on publishing data for mining while preserving individual privacy. The expert talk encompassed information on various Attack and Privacy Models, Anonymization Algorithms and the current focus of research in this area. The lecture was followed by discussion and Q. & A. Session with students and faculty members.
